

# Panel: What is new on the vaccine policy and country support front?

Aurélia Nguyen

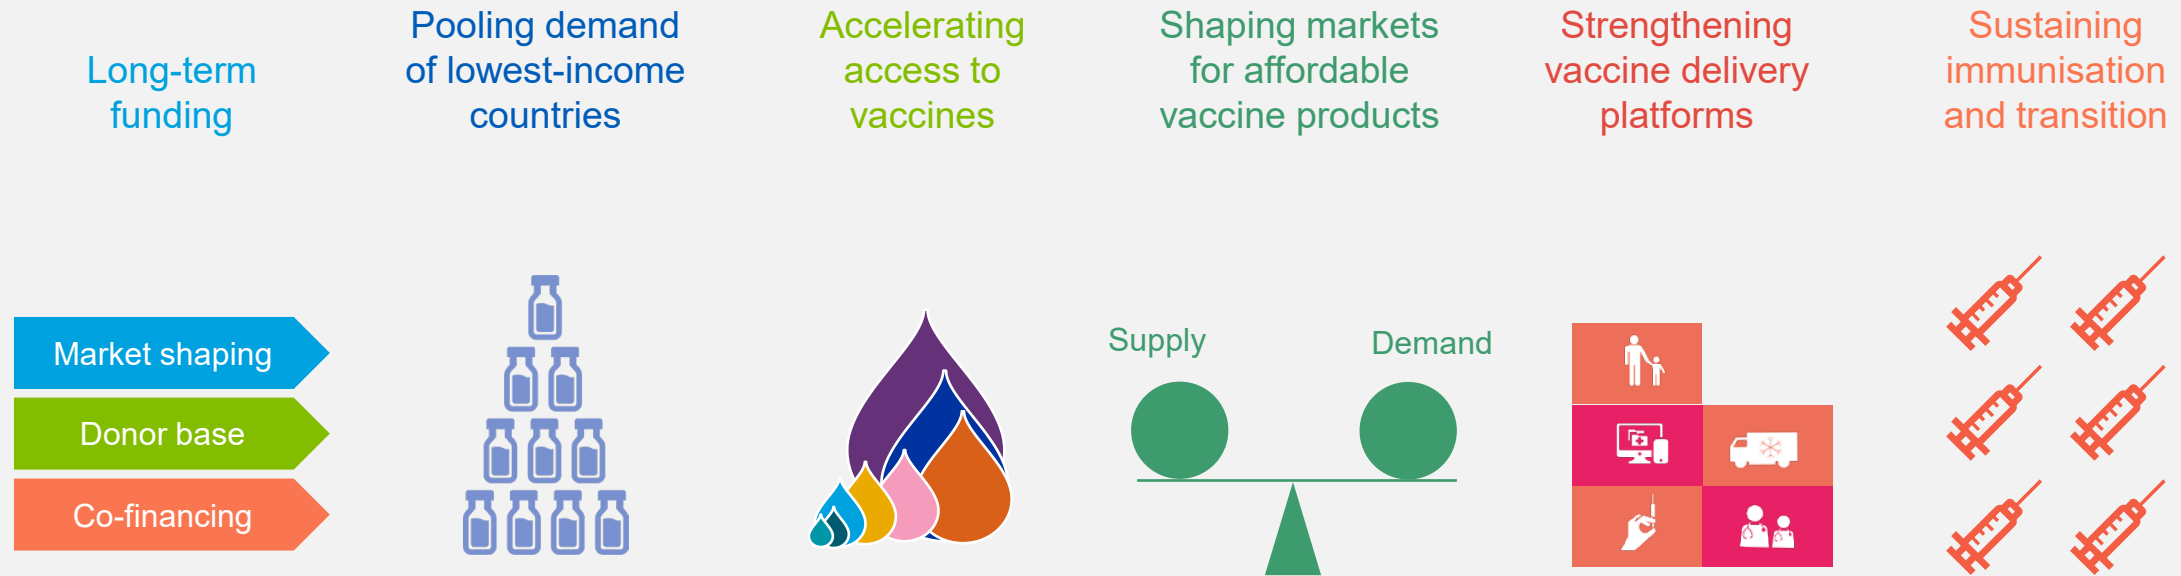

Chief Programme Officer, Gavi, the Vaccine Alliance

ARVAC, 12 June 2024

[gavi.org](https://gavi.org)

# How Gavi achieves impact: creating value for all

# >1 billion immunised; >68 million in 2022 alone

● ccines supported against # of infectious diseases

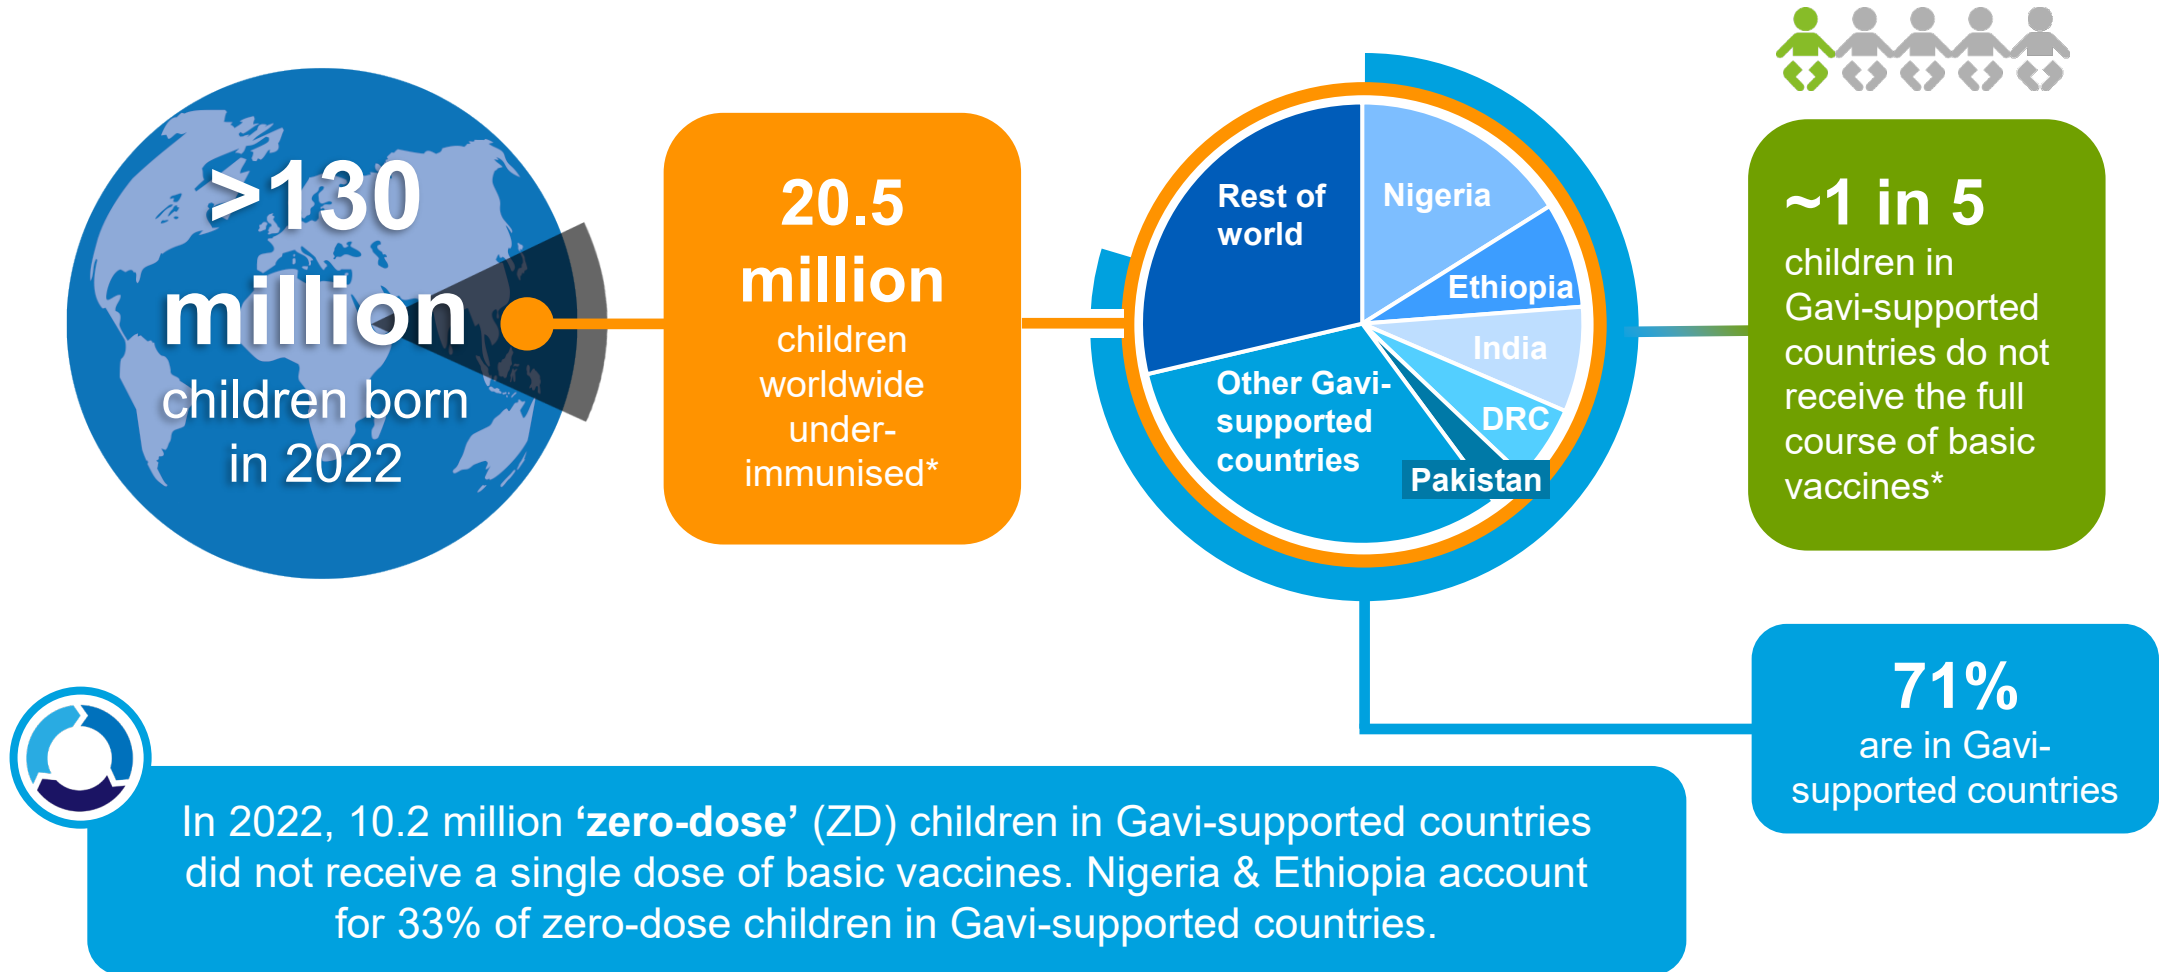

# Gavi's vaccine portfolio has significantly grown over time

As of June 2024, Gavi provides vaccines against **20 infectious diseases**

 Outbreak response

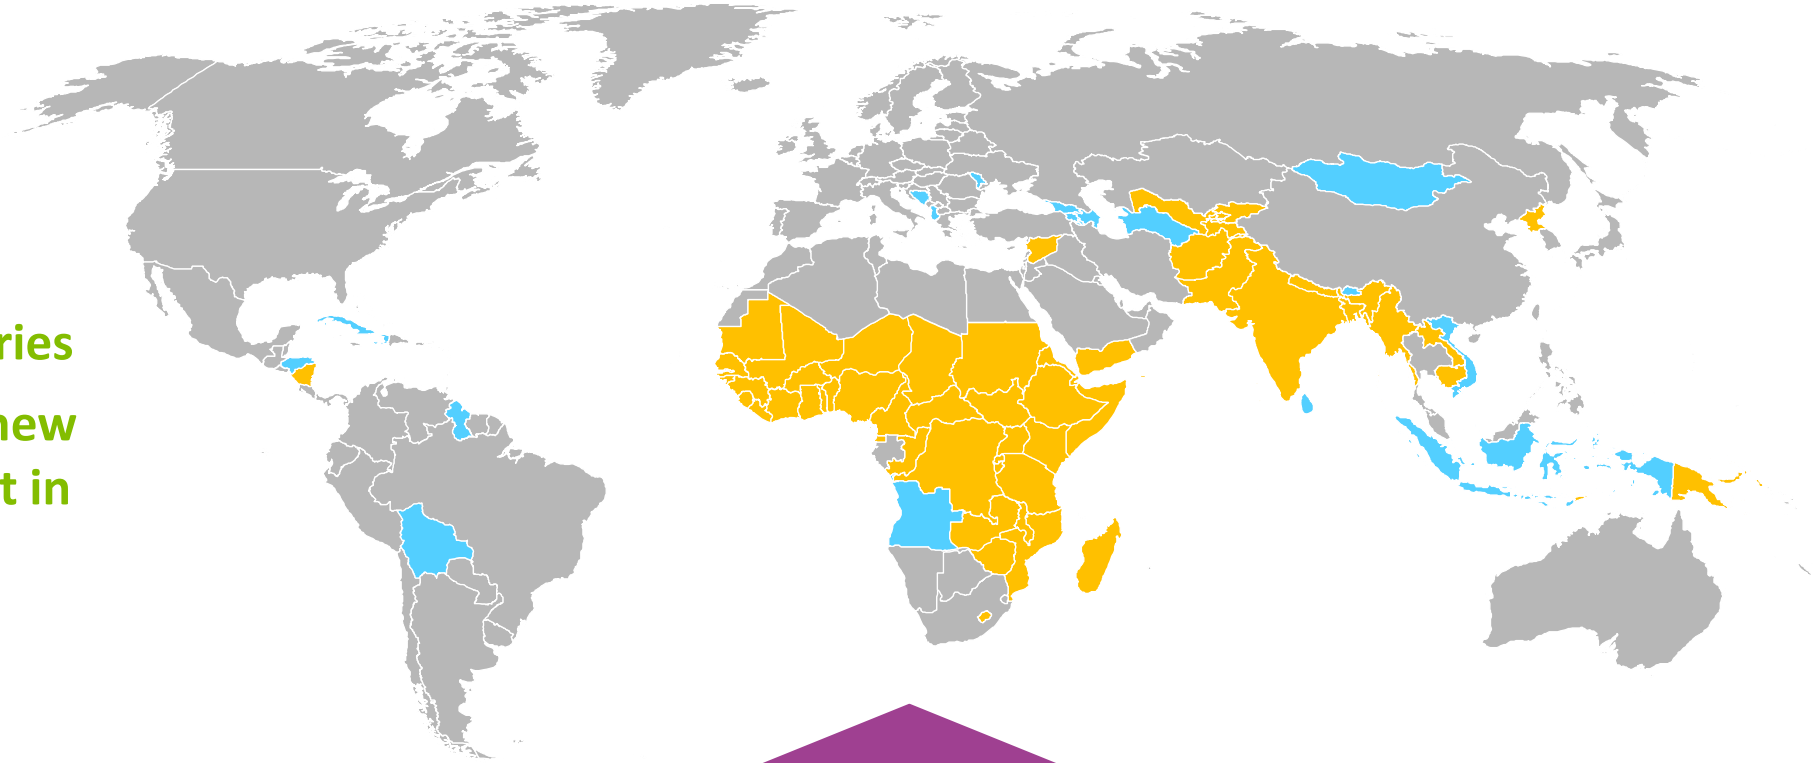

# Closing the immunisation gap: a long road ahead

\*Sources: WHO/UNICEF Estimates of National Immunization Coverage, July 2023; United Nations Population Division World Population Prospects, 2022

# How Gavi supports countries: three key financing levers

**54** countries  
eligible for new  
Gavi support in  
2023

**Health system strengthening  
support (\$2.4B\*)**

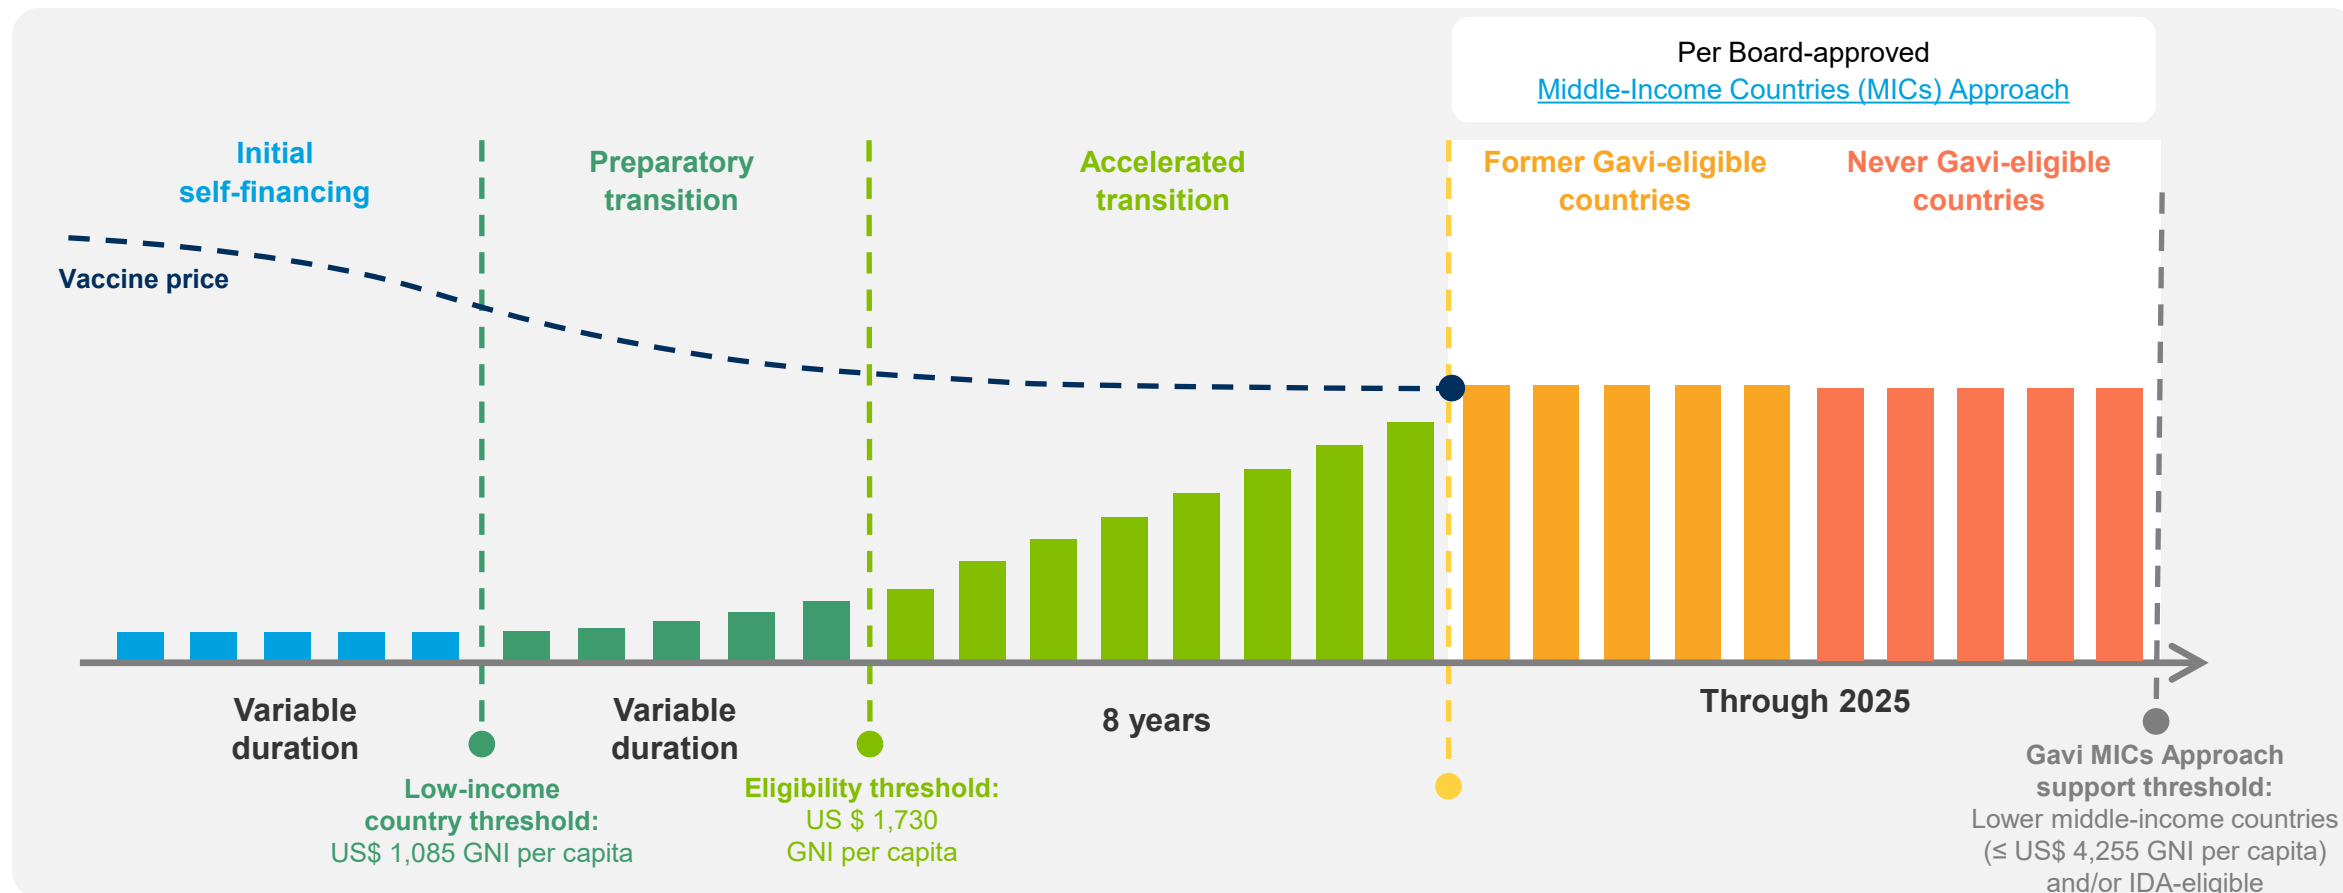

**Vaccine  
support (\$5.3B\*)**

**Technical  
assistance (\$1.2B\*)**

\*2021-2025 forecast expenditure excluding COVAX support

# Making immunisation sustainable: Gavi support evolves with country income, co-financing capacity

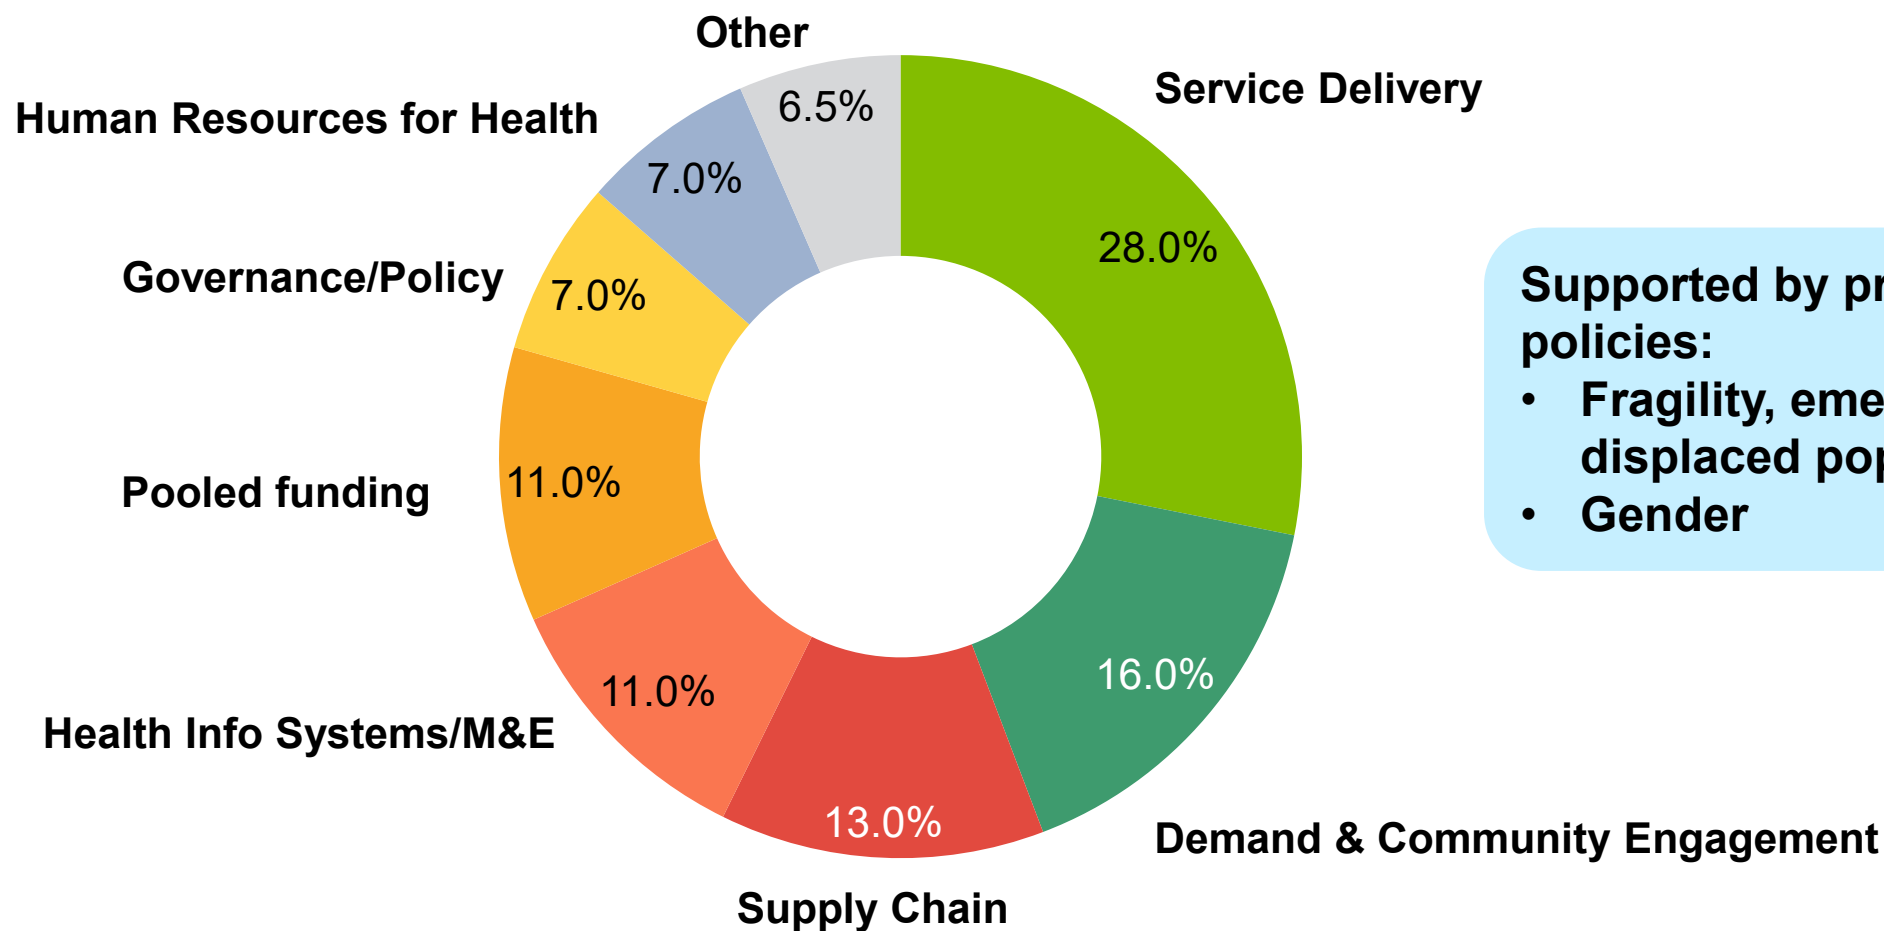

Eligibility and transition model at risk: backsliding, fiscal challenges

# Countries use Gavi's support to invest in health system areas critical for immunisation

% of Health Systems Strengthening and Equity Accelerator Fund allocations by programmatic area

*Grants approved in Gavi 5.0/5.1*

**Supported by programmatic policies:**

- Fragility, emergencies and displaced populations
- Gender

# Gavi 6.0: centred around the Alliance's core mandate and addressing key contextual trends
